A Practical Guide for Improving Flight Path Monitoring

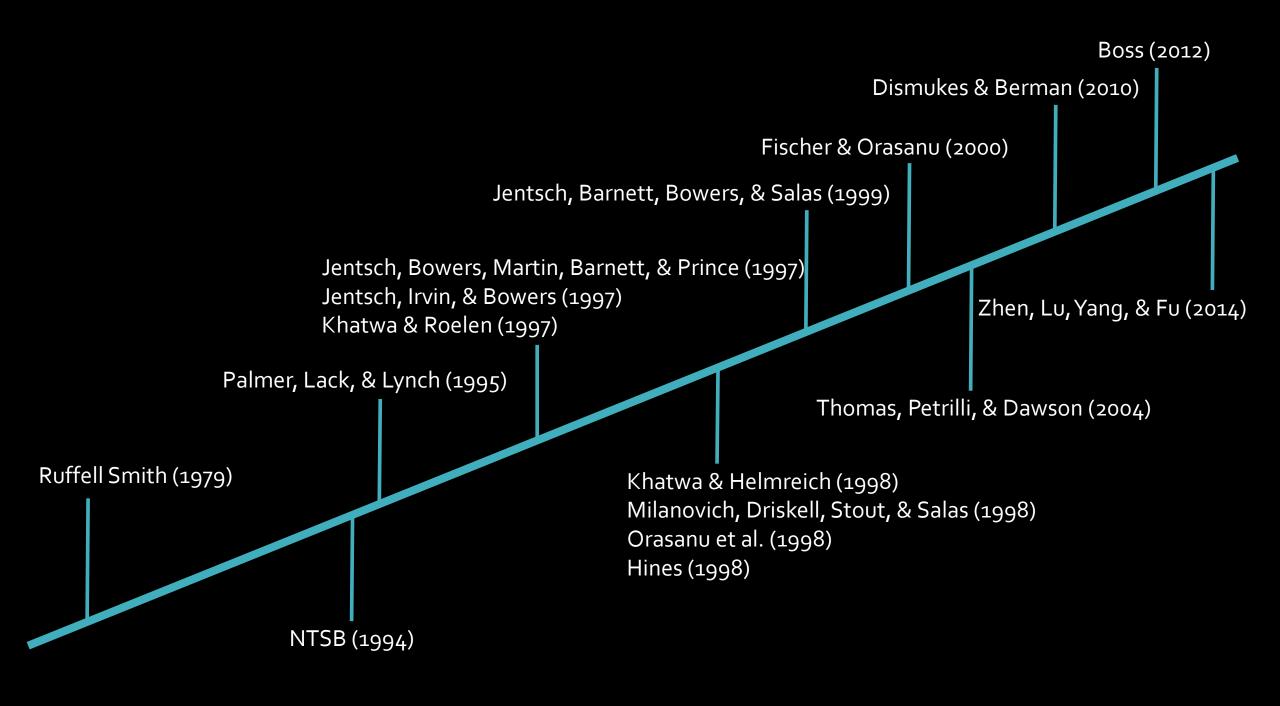

1st Edition

Monitoring

High workload of PF and PM
Expertise: Risk, time and pertinence appreciation
Self-doubt, deference to authority
Face-threat, conflict avoidance

Situational Awareness

Cognitive tunneling, distraction Lack of Level 2/3 SA: Lose 'big picture' Failure to inform captain

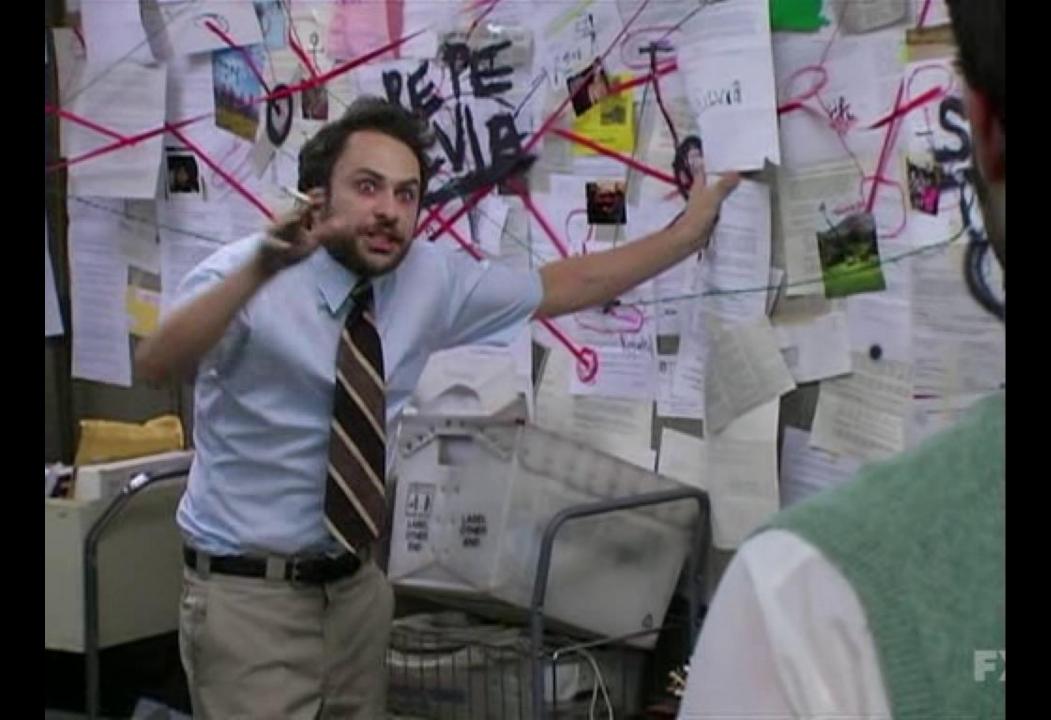

Decision Making

Decision errors

Safety Outcomes

Unsafe acts
Undesired aircraft states
Accidents and Incidents

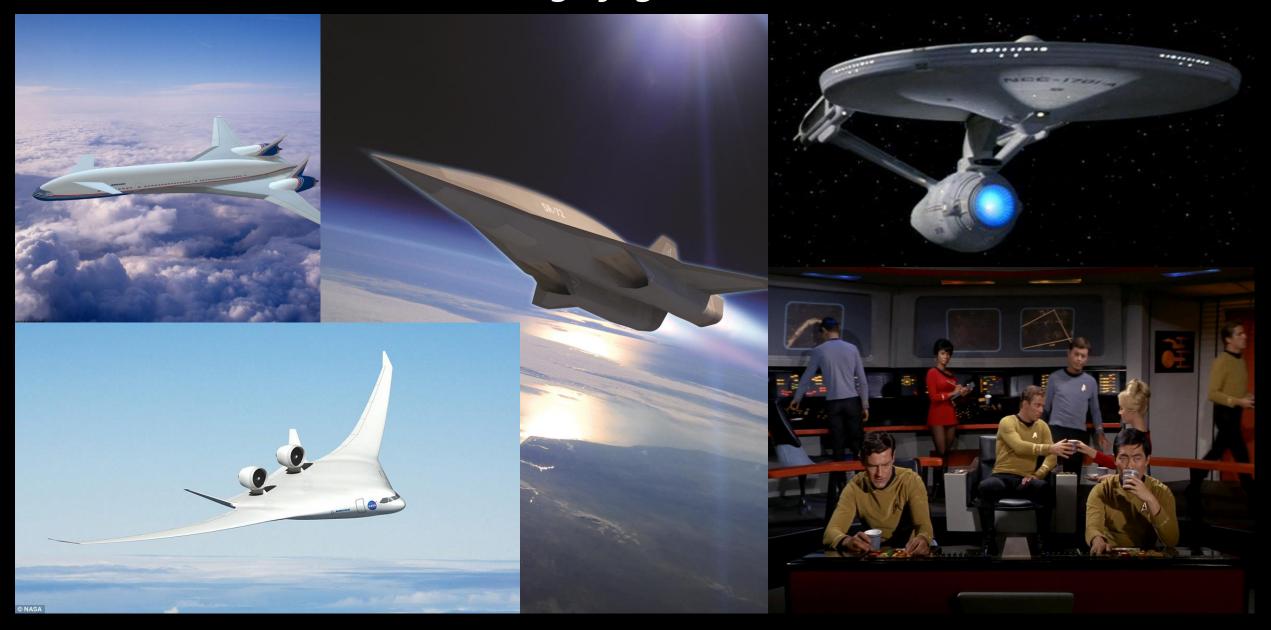

What can we do?

- Address research gaps
- Reassess focus on monitoring
- Review regulations & policy
- Reconsider aircraft equipage

and...

Redesign flight decks?

Thank you!
